

■■ Nessus Vulnerability Scan Report

Scan Target: Local IP (192.168.9.129)
Scan Tool: Nessus Essentials

| Vulnerability | Risk Level | Description |
|----------------------------|------------|--|
| Outdated SMB Protocol | High | May allow remote code execution via EternalBlue. |
| Open RDP Port (3389) | Medium | Can be brute-forced if not secured. |
| Weak SSL/TLS Configuration | Medium | May expose encrypted traffic to downgrade attacks. |
| Unpatched Software | High | Missing critical security updates. |
